

REPLICATION OF THE TOTALITY OF THE LIFE OF THE MAN

"With this you cover the totality of the man"

First taught in [338th Knowledge seeker workshop](#)
of the Keshe foundation

Year 117 in the Aeon of Horus
era vulgaris 23.07.2020

Excerpts of key phrases by knowledge seeker 'Shin'
<http://plasma.square7.ch>

30':

The Soul is the sun.

The sun creates the earth and moon, the Soul creates the physicality of the man.

There is no difference.

To be able to live in both dimensions the same time.

We unite the Soul of the planet, then we unite the unicos.

37':

Gas reactors for space travel.

58':

The Soul has no dimension. You see no GaNS.

1h01':

Picture of the small cup in the 'Cup of Soul'

We put a cup under the centre and we collect 'nothing'. If you see GaNS you become to physical. You have to trust the existence of the soul in your brain, as you have to trust the existence of the Soul in the cup.

The 'cup of man' was half of the structure.

Feed through the dimension of the soul.

Stick close to what is shown. Feeding of the soul and emotions of the soul.

1h10':

You take the energy of the cups, and through your emotion you transfer it to what you like it to be. And that is what you receive on that energy level.

The cup of the universe, which is the planet earth for itself ...

You will come to a much greater knowledge of the universe.

Easy understanding of languages.

Build the cups in the way to be, and then take the GaNS'es from it.

1h15': QUESTIONS

You dictate what is going to be in that cup of soul.

We produce different colour of GaNS'es according to yourself and the soul of physicality and soul of man.

1h21':

The singularity of the creator is over. Everything will be done in tandem.

(→ [329th KSWS](#), 1h09'. *Universe as a twin system*)

Q: John Bliven about Iodine.

A: Iodine is the essence of the fields of emotion. Not the soul. Isotopes of it are different emotions.

1h28':

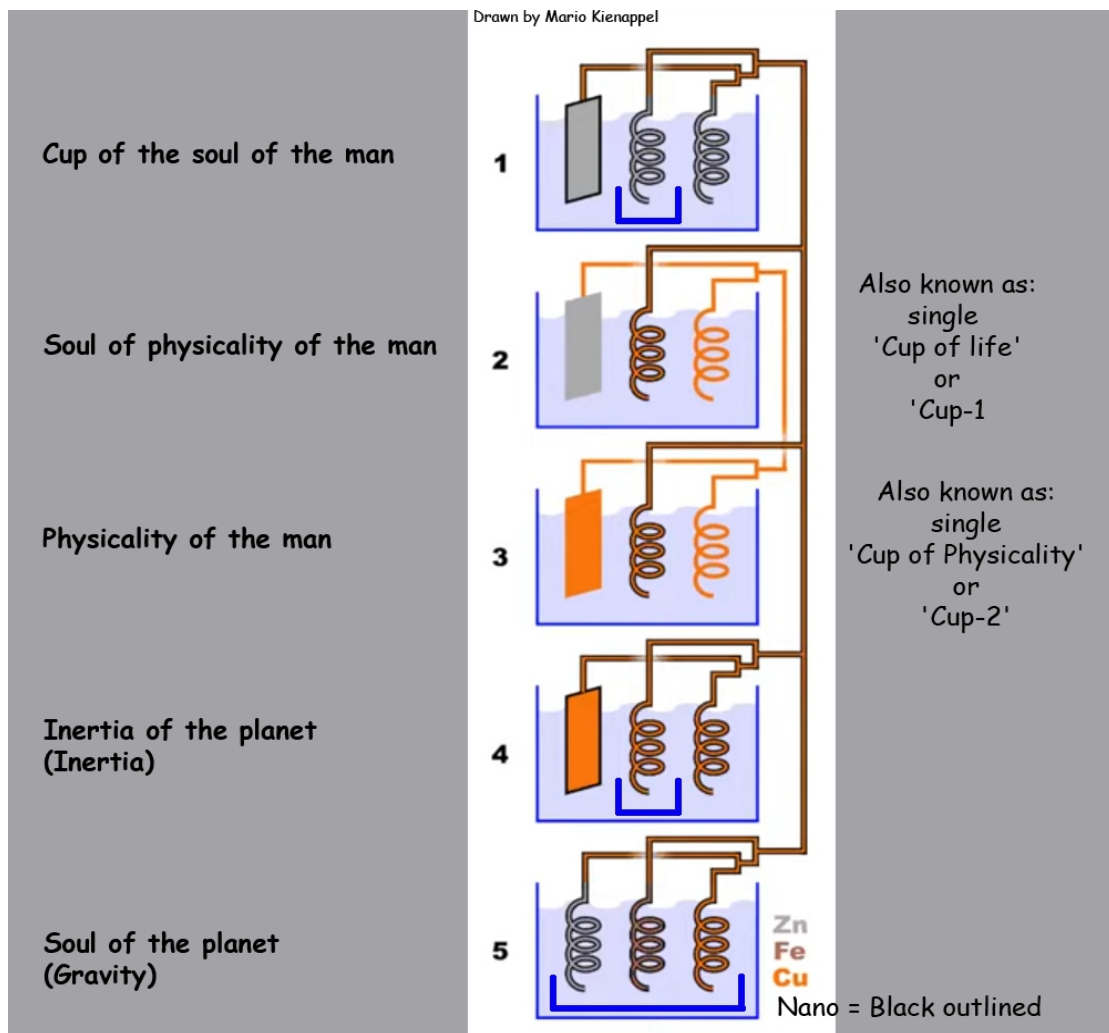

John Bliven explains his reactor setup with Iodine.

1h43' PAUSE until 2h09'

2h10':

REPLICATION OF THE TOTALITY OF THE LIFE OF THE MAN:

With this you cover the totality of the man.

Cup 1: Cup of the soul of the man

Cup 2: Soul of physicality of the man

Cup 3: Physicality of the man

Cup 4: Inertia

Soul of the inertia of the planet (copper based)

Cup 5: Gravity

The soul of this planet. Magnetic / gravitational field of this planet is based on iron.

The 3 essential elements of life and physical dimension.

Zinc: Lungs/brain, Iron: Blood, Copper: Muscles

How you choose your salt water will dictate the emotion and the dimension of the physicality.

2h17':

You might add different salt. You will receive near enough to the replication of your life.

These cups have to be stacked up exactly as it is.

The plates are positioned like the spine.

The materials produced will now be completely different to before. The colour will change.

2h22':

The positions of the small cups in the cups 1,4,5

It's the inertia of the copper which gives physicality to the man

If you take 1 drop of the GaNS'es of any of these cups, done the correct way, it will feed you for one day.

If your intention and soul is to support illness, with the Cup-1 and Cup-5 you will elevate the soul of the man. Because you eliminate the inertia and physical condition. You use the physical free fields of the planet to create a condition of elevation of the soul.

If you have a physical condition which is psychosomatic you use Cup-2 and Cup-3 GaNS'es.

If you have a problem with conversion or evolution, you use Cup-4 and Cup-5.

Depending which evolution has taken place, use Cup-2 or Cup-3. This is to get rid of the inheritant diseases.

The most important of it: You are the man, the creator of it.

You have established every dimension (*5 cups*).

Do it the way that you are happy with your work.

Use this knowledge to overcome hunger, disease, to elevate your soul and to work through the soul.

You can overcome Corona or any other virus, any diseases in space. By creating the right condition for the soul, you support the whole of your understanding, structure and physicality.

2h30':

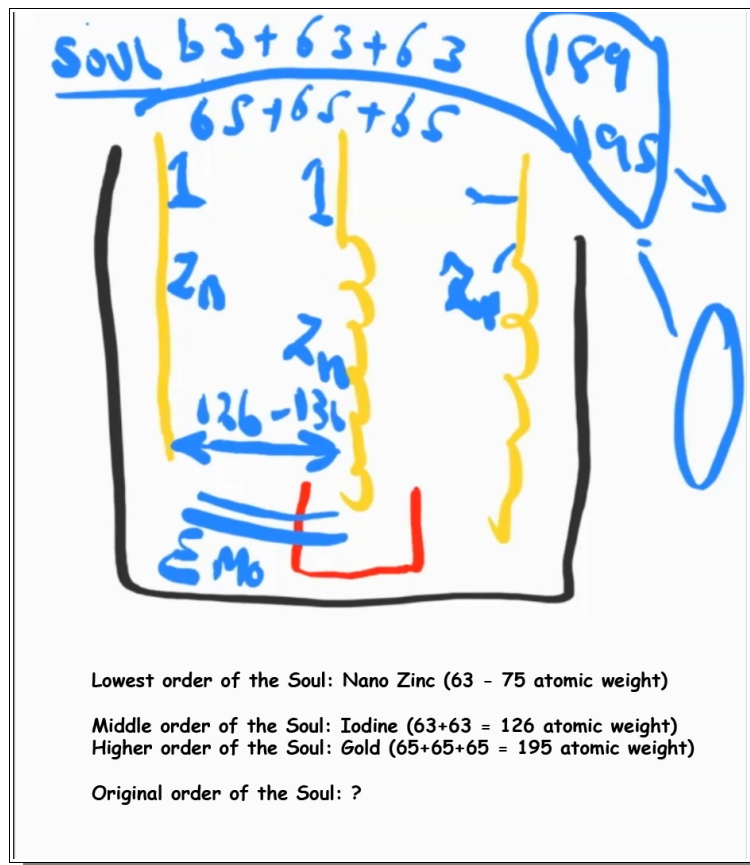

Mankind has to do two things to reach universal community:

- To transfer knowledge unconditionally, without any hesitation
- (not mentioned)

Try with drops not gallons to feed you.

2h34':

Image 2, the cup of soul and atomic weights

We collect nothing but transparency.

- Centre Zinc coil: Physicality of the man
- Zinc plate: The dimension of massive physicality of the man with the planet
- 2nd Zinc coil: Interaction of the emotion field of the zinc.

(The interactions of the zinc parts refer to Iodine (126-136) and gold (189-195) and above)

Depending on the isotopes of the nano coating, you get the emotions in totality (the cell, feel and soul).

You find what the soul shares with the body of the man.

In the future you can measure where your soul will take place in the unicos.

2h41':

QUESTIONS

Q: Can we place the cups also horizontally? Or just vertically?

A: We place the man vertically. If you want to place it horizontally, you have to put under each cup the Cup-4 and Cup-5.

Q: About atomic weight interactions in the Cup-1

A: Nano-zinc: We go from 63 up to 75. It depends.

Everything now counts: The number of turns you make, how you connect the zink plates, what salinity you use, the distance and position ...

Iron sits in the centre (*Cup-5*), because in the gravitational magnetic field of the earth, iron is the magnetic field dominator.

2h50':

In Cup-5 you have combination of the matter state, liquid state and gaseous state. It's the closest replication of the structure of the earth.

2h53':

In the coming teachings i will teach you how to use the Soul to create flight. To create different combinations of freedom of the Soul from physicality, and return back to physicality. To be able to live in both dimensions, aware of both dimensions to the same time, not as in sleep. The Soul of the knowledge is shared, not the word of the knowledge.

2h58':

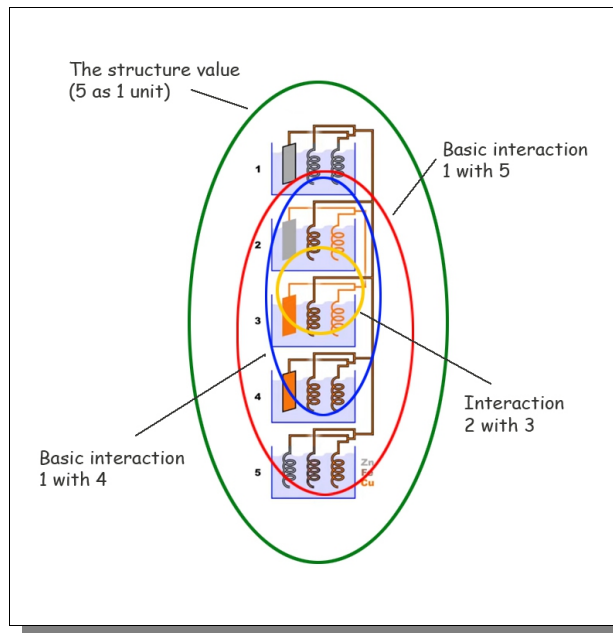

In the coming teachings i will show you how to transfer your Soul. Those who go to the depths of the universe need assurance that the Soul arrives at a point of destination. So you will be able to make a copy of your Soul that, when you arrive, you can understand both dimensions. You can visit your uncles in Paris and London and you can be there at the same time. Replication of the Soul of the man.

3h01':

Never use galvanized in Cup-5, just iron.

3h03':

This system has an overall energy value, a cup value, a structure value (*all 5 together as 1*). And combinations of 'different things' (*draws circles*).

Play with the combinations ...

Q: Is there a certain distance between the cups?

A: What's the distance between your neck, heart and brain where the Soul is ...

If it's not used the whole structure, you leave your body outside and play with the fields (*for example*).

3h34':

Q: Armen – Do you use nano coated wires for connection?

A: You can use nano coated wires to connect the nano coils, so you have no conversion. Later all get's nano coated the plasma way anyway.

Q: Armen – Why a flat piece in the cup?

A: The flat plate has a reason, it creates a barrier field force. Otherwise your system will run out of control. No reflector, it's a limitation of the fields.

When you put so many plates and so many coils, these plates in the total structure will behave like a coil anyway, because each one becomes like one turn of the coil.

The nano coated materials in Cup-5 are like an alloy, but in plasmatic fields.

In some of the cups you produce from hydrogen to copper, to zinc and in some other it produces plutonium and uranium field strengths.

Personal addon, not part of the workshop teaching
